INTRODUCTION

The mission of this project is to create an easy and accessible platform for people to donate their unwanted items to those in need. The application will enable users to connect with each other, giving those who are in need and can take the chance to benefit from the generosity of others. This platform will help create a more generous and compassionate society by allowing users to give back to their community. Our role in this endeavor is to keep items given to us for a set period in our inventory until someone wants them. If the items are not taken, we recycle them to the best of our abilities.

As our name suggests, we are committed to giving back to the community through other means as well, such as offering volunteering opportunities within our company. These volunteer positions can provide valuable experience to those who participate. Volunteers can choose to work in the field by helping with the movement of items, which is not too physically demanding. Alternatively, they can assist with keeping inventory and performing other office-related tasks.

Regarding our location and office, we intend to keep it near the city for several reasons. Firstly, it would be more convenient and cost-effective to transport inventory to consumers. Additionally, if consumers prefer to pick up the items themselves, it would be easier to facilitate. Initially, we plan to establish one main warehouse where we will operate from. However, once we secure sufficient funding, we may consider expanding to other locations.

Fundraising projects will be the primary method for generating capital for our company. Through these projects, we aim to attract backers who share our vision and are willing to support our cause.

In addition to our efforts as an NGO, we are also dedicated to making a lasting impact on the community.

SWOT ANALYSIS

SWOT ANALYSIS

Give&Take

STRENGTHS

S

- Waste Reduction
- Community Involvement
- Passionate Volunteers
- Sustainability
- Tax Exemption
- Limited Liability
- Collaboration with Government Sectors

WEAKNESS

W

- Connection Difficulty
- Lack of Funds
- Slow Start
- Ideal Warehouse Location
- Creating Awareness Difficulty

OPPORTUNITIES

O

- Experience Gains among Students
- Business Expansion
- Less Stress for People Moving

THREATS

T

- High-Level Competitors
- Technological Issues
- Unforeseen Expenses
- Lack of Potential Volunteers

PESTLE ANALYSIS

PESTLE ANALYSIS

P

POLITICAL

- Taxation Policies
- Changes in Political Landscape
- Government Interference

E

ECONOMIC

- Increase in Disposable Income
- Economic Growth and Contraction
- Consumer Spending Power

S

SOCIAL

- Rise in Awareness about Sustainability and Waste Reduction
- Consumer Attitude towards Online Shopping and Services
- Change in Consumer Spending Habits

T

TECHNOLOGICAL

- Expansion of Social Media Platforms
- Expansion of Artificial Intelligence
- Scarcity of IT Experts

L

LEGAL

- Changes in Labor Laws
- Changes in Environmental Laws and Regulations related to Waste and Pollution
- Mishandling Critical Data

E

ENVIRONMENTAL

- Increase in Energy Costs
- Carbon Emissions and Alternative Fuel Options
- Climate Change and Environmental Hazards

PROBLEM AND OBJECTIVE TREE

Problem Tree & Objective Tree

FEASIBILITY STUDY

Introduction:

Give&Take is a non-profit organization that aims to facilitate the donation of items when people move out of the country. The organization's goal is to reduce waste, promote sustainability, and help those in need by redirecting items that would otherwise be thrown away. This feasibility study will analyze the potential success of Give&Take by examining the organization's market demand, financial viability, and operational feasibility.

Market Demand:

The success of Give&Take relies on the existence of a market demand for its services. In this case, there are several indicators that suggest the market demand for Give&Take's services is high. The following are some of the factors that indicate strong market demand:

A growing awareness of sustainability: More and more people are becoming conscious of their impact on the environment and are looking for ways to reduce waste.

High cost of shipping items: Shipping items overseas can be expensive, and people are often faced with the decision of what to do with their belongings when they move.

An increase in international travel: With the growth of global travel, more people are moving overseas, creating a larger potential market for Give&Take.

A desire to help others: Many people are looking for ways to give back and help others, and donating items when moving overseas is an easy way to do so.

Financial Viability:

The financial viability of Give&Take is crucial for the organization's success. The following are some of the factors that indicate financial viability:

Low overhead costs: As a non-profit organization, Give&Take will not need to allocate resources for shareholders, investors, or owners. This will help keep overhead costs low.

Revenue streams: Give&Take can generate revenue through various streams such as charging a fee for pick up and drop off services, selling some of the donated items, or soliciting donations from individuals and organizations.

Partnerships: Give&Take can establish partnerships with other organizations to provide additional services, such as storage or transportation, which can generate revenue.

Operational Feasibility:

The operational feasibility of Give&Take is essential for the organization's success. The following are some of the factors that indicate operational feasibility:

Infrastructure: Give&Take will need to establish infrastructure, such as warehouses and transportation, to collect, store, and distribute donated items.

Staffing: Give&Take will need to hire staff to manage the day-to-day operations, including pickup and drop-off services, and administration.

Technology: Give&Take can leverage technology to streamline its operations, such as using a website or mobile application to schedule pick-ups, manage inventory, and communicate with donors.

Conclusion:

Based on the analysis of the market demand, financial viability, and operational feasibility, Give&Take is a feasible non-profit organization. The organization has the potential to address the growing need for sustainable solutions and help those in need. With proper planning and execution, Give&Take can become a successful organization and make a positive impact on the environment and society.

LOGICAL FRAMEWORK MATRIX

LOGFRAME MATRIX	PROJECT SUMMARY	INDICATORS	MEANS OF VERIFICATION	RISKS/ ASSUMPTIONS
GOALS	Our long-term goal is to create a sustainable environment mainly for students and people in our city	90 to 100 % Satisfied consumers and a 50 % better environment like cleaner air and water	Using surveys for customers satisfaction	Long term climate sustainability and overall better health for people
OUTCOME	- increase in Reusing and Recycling. - reduce in Disposable Culture	- recycling increases by 25% in the next 3 years - litter and garbage will be less in the surrounding area by 20%	- checking recycling plant reports and studies as well asking government for data - seeing a cleaner environment	- environment benefits in the long term - people use sustainable items more
OUTPUTS	- People find an alternative way to get rid of their unwanted items - Single-use items are recycled or donated	100 People give us 100 different items for recycling or donating as a test for us 50% People use more sustainable items	- A measure of customers using our service - Survey results	- People continue recycling and donating, which benefits the environment. - Less garbage in landfills and oceans
ACTIVITIES	- Waste is collected and separated properly. - Online Platforms are created to handle waste in remote areas.	- People are told about the benefits of waste separation through an advertisement for 1 month. - The app is developed that is free and accessible where people can test the beta for 2 months.	- Views on the advertisement - Download records.	- People realize the benefit of waste separation. - The app helps people.

CLOSING

In conclusion, our project is driven by a mission to create an easy and accessible platform for people to donate their unwanted items to those in need. Through our application, users are empowered to connect with one another and extend their generosity to those who require assistance. By fostering a culture of giving back, we aspire to cultivate a more generous and compassionate society where everyone can contribute to the well-being of their community.

Our role in this endeavor is to diligently manage and maintain an inventory of donated items until they find their rightful recipients. If items are not claimed Within a specific timeframe, we are committed to responsibly recycling them, ensuring minimal waste and environmental impact.

Furthermore, our commitment to community welfare goes beyond our platform. We actively provide volunteering opportunities within our organization, offering individuals valuable experiences and a chance to contribute directly. Whether it's assisting with the movement of items or supporting office-related tasks, volunteers play an integral role in our operations, and their dedication helps us fulfill our mission.

Regarding our location and office, we have strategically chosen to establish our presence near the city. This decision allows for efficient transportation of inventory to consumers, and it facilitates item pickup for those who prefer a more hands-on approach. While we initially plan to operate from a central warehouse, our goal is to expand to additional locations as we secure the necessary funding.

To ensure the sustainability and growth of our project, fundraising projects will be our primary method of generating capital. We aim to engage and attract backers who share our vision and are enthusiastic about supporting our cause. Through their support, we can enhance our platform, expand our reach, and make an even greater impact on the lives of those in need.

In closing, we are deeply grateful for the opportunity to create positive change through this project. Together, we can build a society where generosity and compassion thrive, leaving a lasting impact on the communities we serve. Join us on this journey, and together, let's make a difference.
